

Konect

End-to-End EV Charging Ecosystem

Where charging meets convenience.

Easy | Seamless | Increased ROI

Konect

 **GILBARCO
VEEDER-ROOT**

We created Konect with a simple goal – to do charging better.

Supporting every aspect of EV charging infrastructure, ensuring hassle-free operation for businesses and worry-free mobility for drivers.

Konect

We understand the challenges of managing a mixed-fuel environment.

We are forging a future where offering charging for electric vehicles is not just a necessity for our customers, but a profitable venture. We do this with a seamless end-to-end EV charging ecosystem, so our customers can focus on their core business and drivers don't have to worry about staying mobile.

While Konect was launched specifically to support the development of charge point infrastructure, Gilbarco Veeder-Root has been manufacturing the world's leading fueling and convenience store equipment and technology since 1865. This allows us to combine cutting-edge knowledge with over a century of experience.

Connect to easy, connect to seamless., connect to higher ROI.

Choose Konect – Where charging meets convenience.

Designed to boost fuel retailers' ROI

We've crafted a seamless, positive, and connected customer experience:

Easy

We provide all the building blocks required to create and operate a world-class charging network – all in one place, with one business.

Seamless

Seamless: with existing fuel retail ecosystems, providing a vertically integrated end-to-end charging solution tailored explicitly to our customers.

Profitable

We minimize upfront capital and ongoing operating expenses while unlocking new profit pools, creating a meaningful return on investment

Designed to boost fuel retailers' ROI

Switch on a seamless, connected, and positive customer experience:

Konect offers a turnkey electric vehicle (EV) charging infrastructure ecosystem, that enables a seamless integration with existing fueling, payment, and service offerings.

Our end-to-end EV charging ecosystem makes it easy for drivers to stay mobile and effortless for charge point operators (CPOs) to focus on their core operations.

At Konect, we guide charge point operators through every step of the e-Mobility adoption process by offering tailored solutions for seamless site planning, funding, hardware, software, and installation, as well as infrastructure management, support, service, and maintenance.

Supports your business at every stage of the EV adoption process:

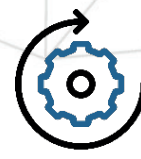

Consulting

We'll help you select the right locations, equipment, grants, and financing options, including options such as on-site battery storage for energy management solutions, like peak shaving and supplying energy back to the grid.

Ecosystem

We enable an end-to-end EV charging ecosystem through our suite of hardware and CPO-as-a-Service software solutions designed for easier integration and a familiar interface, reducing complexity and the need for additional training.

Support

Our team will operate the infrastructure for you, which includes a white-label charging app for customers, predictive diagnostics, repairs, and maintenance, as well as a large global team of technicians to maximize uptime, profit, and loyalty.

Adding value across the value chain

Access all the building blocks you need to create and operate a world-class charging network – all in one place, all with one business.

Konect empowers fuel retailers and fleet operators to introduce reliable and commercially compelling charging for a fast-growing market.

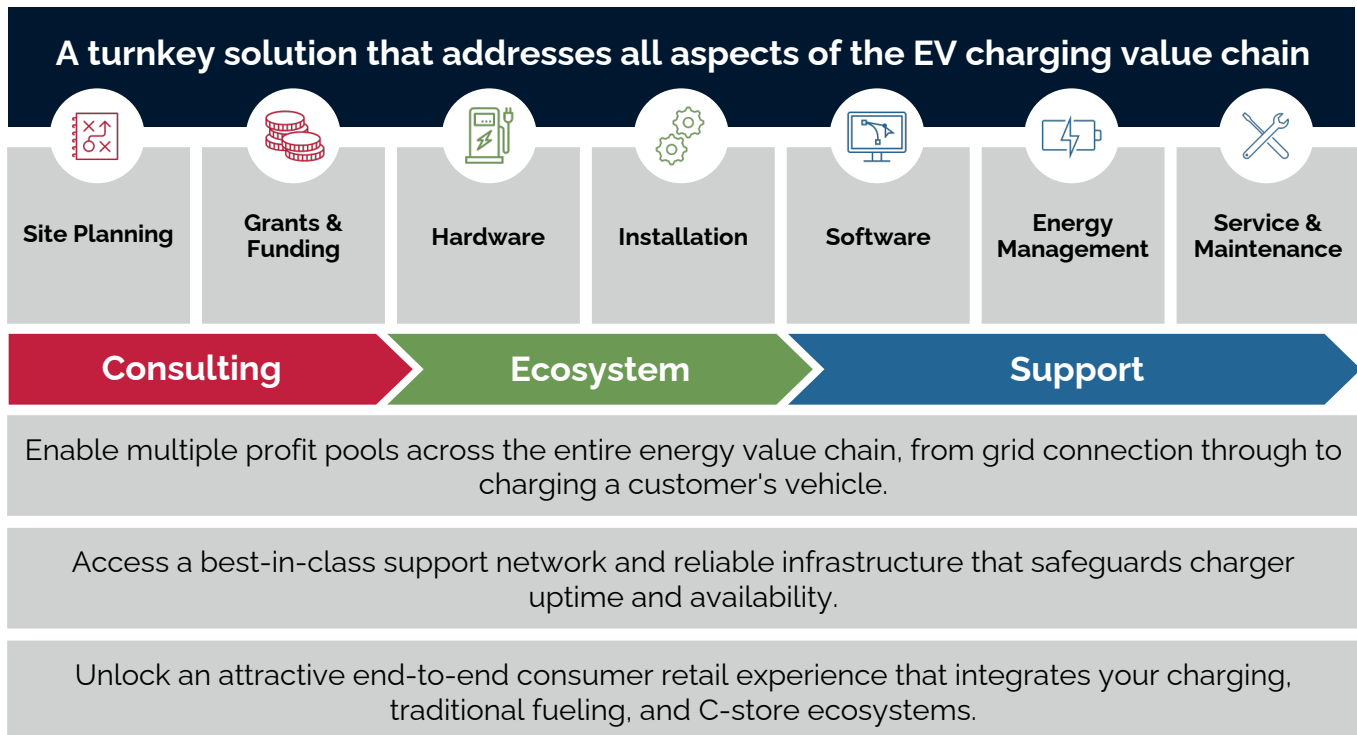

We offer a unique single-supplier solution that supports you at every step of the journey, allowing you to focus on your core businesses.

With Konect, you're not just choosing an end-to-end EV charging partner; you're charging ahead into a future where every charge amplifies the connections that power our lives, our communities, and our world.

Our end-to-end EV charging system, which we manage from implementation to daily operation, is designed to make charging easier for everyone.

Konect offers a turnkey electric vehicle (EV) charging infrastructure ecosystem, enabling seamless integration with existing fueling, payment, and service offerings.

Therefore, retailers benefit from our solution as an extension of their forecourt, providing a vertically integrated end-to-end charging solution tailored explicitly to support fuel retailers.

EV Charging Ecosystem

Consulting

Dedicated site selection and funding support

Konect Consulting helps you to select the best locations, equipment, grants, and funding options.

We ensure you are confident in entering the EV space, meeting site and network-level ROI goals, and driving down upfront costs.

- **Site Selection:** Assists customers in selecting optimal locations, equipment, grants, and funding options to reach site & network level ROI goals
- **Site Design:** Facilitates comprehensive assessments for efficient resource utilization.
- **Grants & Funding:** Provides expertise on grants and funding, helping to limit upfront costs and improve the feasibility of the project.

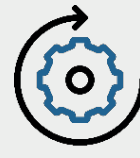

Ecosystem

Unlock an ecosystem of hardware and unparalleled installation expertise

Experience the future of fueling with confidence and convenience, tailored for the C-store space.

Gilbarco Veeder-Root has a comprehensive network of distributors, authorised service providers (ASCs), and its own service organization, ensuring exceptional support and service across the United States, Europe and Australia.

- **Hardware:** C-store focused, purpose-built DC fast chargers, leveraging next-generation power electronics with high reliability that drive greater uptime and a better user experience, positively impacting both revenue & cost.
- **Installation:** Enables all aspects of your EV installation journey- including work quality and safety - through access to Gilbarco Veeder-Root's installation network.

Support

Designed to seamlessly integrate into your existing C-store ecosystem

Utilize our fuel industry experience, access best-in-class charger management software, and leverage our extensive global service network for proactive, maintenance, that ensures reliable operations and profitable expansion.

- **Software:** Our CPO-as-a-Service offering integrates into the existing C-store ecosystem & reduces the costs of becoming a CPO while ensuring high-caliber network monitoring.
- **Energy Management:** Offered as part of CPO-as-a-Service, you can seamlessly integrate on-site battery hardware and unlock new revenue streams.
- **Service & maintenance:** Enjoy remote management and easy integration with our existing Gilbarco Veeder-Root service and maintenance channel, significantly improving uptime.

Leading your journey to become a Charge Point Operator

Our turnkey solution simplifies the complex EV charging landscape, significantly reducing operational expenses and enabling you to operate as a charge point operator (CPO) without substantial resource allocation.

Market-leading, ultra-fast EV chargers that simplify payment

Our C-store-focused EV chargers offer high reliability that drives greater uptime and a better user experience, positively impacting both revenue and cost.

The integration of the Invenco by GVR payment ecosystem into our chargers allows CPOs to leverage their existing site architecture across traditional fueling and e-Mobility, to unlock the benefits of loyalty programs, and existing POS integrations to drive a closer connection with your consumers.

Discover the future of EV charging with our range of EV chargers that boasts fast and efficient charging capabilities. With its modular design that captivates users with a durable 32-inch screen that supports both interaction and advertising, our range ensures reliability, quality and an improved consumer charging experience.

- DC Fast Chargers with state-of-the-art technology combining payment, media, loyalty technology, and DC charger expertise.
- Tailored to support fuel retailers' needs, while Gilbarco Veeder-Root's contributions act as the anchor that ties the entire EV ecosystem into the existing fuel retail landscape.

A managed software service that works

CPO-as-a-Service

Utilize our fuel industry experience to help you deliver a seamless EV solution. Our CPO-as-a-Service smart cloud software suite supports you in launching, scaling, and optimizing your EV charging business. Backed by all the tools you need to build EV charging into your business, it greatly reduces the costs of becoming a CPO and ensures high-caliber network monitoring.

- **CPO-as-a-Service:** We manage everything that a CPO needs to provide all within one seamless service.
- **Credentials:** In total Konect have managed 100,000+ plugs, supported 10M+ transactions, used by 700,000+ drivers in 18 countries.
- **Service Offering:** Cloud management software for fuel retailers and fleet operators, streamlining operations with charger monitoring.
- **Software Options:** Intuitive portal for charger management, plus Managed Service Solution with third-party integrations.

We manage everything a Charge Point Operator (CPO) needs to provide to EV customers - all within one seamless service.

Support when you need it most.

Our extensive global service network – at your fingertips.

We pride ourselves on being the industry's trusted partner in the realm of alternative fuel technologies.

With our unwavering commitment to world-class safety standards, our decades of industry experience, and our prompt delivery response, our EV service and maintenance capabilities are by far the most comprehensive in the market today.

- **Installation and Commissioning:**
Decades of expertise.
- **Planned Preventative Maintenance:**
Scheduled service, compliance.
- **Response:**
24/7 support.
- **Global Reach:**
Over 600 Service Contractors, 100 technicians in Australia, 2,700+ in North America and, 500+ employees in Europe.
- **Expertise and Support:**
Warranty and post-warranty maintenance by dedicated professionals.

Access our core aftermarket capabilities through Konect's extensive global service network including installation & commissioning, planned preventative service and maintenance, and 24/7/365 support and logistics. Additionally, our proactive maintenance ensures reliable operations and profitable expansion.
